
Objective

Result-oriented Software Developer with 2.9 years of experience, Love creating and innovating. Proficient in modern web development frameworks, agile methodologies, and building dynamic, scalable web applications. Adept at collaborating with cross-functional teams to deliver solutions aligned with business goals. Seeking a challenging role to contribute my expertise in React.js, Node.js, and full-stack development to build innovative, user-focused products

Skills

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Next.js, Bootstrap, GSAP (Animations)

Backend Development: Node.js, Express.js, RESTful APIs, MongoDB, Socket.io, JWT Authentication

Development Tools & Practices: Git, Postman, NPM Agile/Scrum, CI/CD Pipelines, Debugging, Netlify, Render

Other Skills: Cross-Browser Compatibility, SEO Optimization, Performance Tuning, OpenAI API Integration

Certifications : Full Stack Developer (MERN) – Issued June 2024, Agile Scrum Master, Advanced JavaScript, HTML & CSS

Experience

Software Developer - SAP Engineering (2024 – Present)

Developing of an inventory management system using the **MERN stack**, optimizing stock tracking and operational workflows. Implemented features such as CRUD operations, authentication (JWT), and data visualization, AI technologies to enhance user experience. Improved system performance and scalability by integrating **MongoDB Atlas** and **Express.js** middleware. As the full stack developer learned the skills of managing frontend and backend, along with gathering requirements, developing features according to the requirements, created wireframes, user flow to visualize design concepts.

Frontend Developer - 1 Click Capital (2022 – 2023)

Optimized website performance, reducing loading times by 20% through advanced **GSAP animations** and code refactoring. Collaborated with designers and backend developers to implement reusable **React components** and dynamic web elements. Used MUI, created restful APIs

Achievements: Awarded “Best Employee of the Month” in Nov-Dec 2022 for exceptional performance. **Reason for leaving**: Lack of ongoing projects and personal reasons.

Freelance Projects - (2021 – Present)

Yallah Hajj- Build and deployed frontend website using Reactjs, integrated Emailjs, animations collaborated with UI/UX designer to bring this beautiful website to life.

SkyDreamers: Built a content-generation platform leveraging **ChatGPT API** for automated content creation, enhancing user engagement and workflow productivity.

RazaSoftTech Website: Modernized razasofttech.com by redesigning UX/UI, optimizing page load speed (Lighthouse score improvement from 75 to 92), and implementing SEO best practices.

Independent Study - UPSC Exam Preparation (2021 – 2022) Strengthened discipline, perseverance, and the ability to manage time effectively and analytical skills during a year of dedicated preparation for the competitive UPSC exam.

Projects

MERN Authentication System: MongoDB, Express.js, React.js, Node.js (MERN), JWT. Built a full-stack authentication system with JWT-based user authentication and role-based access control. Deployed on Render: <https://mern-stack-auth-jdh2.onrender.com>

Education - BSc in Information Technology from SM Shetty College(*Graduated 2020*)
